

## What's new in CaseViewNet Client 2.0/2.1.0!

**Dynamic Word Index** saves the time of visiting each occurrence of a key word throughout the transcript to find the passage you want.

**Windows® Clipboard Copy & Paste** means you never have to retype referenced testimony again.

**Follow Realtime Indicator** flashes when you've digressed to make an annotation as a reminder to get back online.

**Page Number Indicator** provides reference point for current testimony, including total number of pages

**Windows Vista Folder Compliance** means that the Data and Report folders will be created in the Documents folder (or the My Documents folder in Windows XP). When upgrading from an earlier version of CaseViewNet, any existing CaseViewNet files will be moved to these new locations for convenient access.

**Serial Input from any court reporter** that sends realtime to viewers such as CaseView®II, LiveNote®, Summation® and others, can send realtime to the CaseViewNet Client 2.1.0 using the same serial cables, splitters and adapters traditionally used for realtime court reporting.

**Case CATalyst/CaseViewNet providers** provide WiFi connectivity with RapidRefresh for the finest rough-draft realtime ever possible. Ask for a Case CATalyst reporter for all your realtime events!

**Update to the latest version of CaseViewNet!**

It's easy to update your CaseViewNet Client to the latest version. Using your Internet-enabled computer, launch CaseViewNet, Go to Help, Check for Updates, and follow the prompts.

Be sure to also update any memory sticks/thumb drives that have earlier versions of CaseViewNet Client. Check for updates regularly for best results. They're free!

Visit [www.caseviewnet.com](http://www.caseviewnet.com) to get a free download of CaseViewNet Client.
