

**Get CaseViewNet Client for your next realtime event.**

Live testimony immediately appears on your computer screen as the court reporter writes realtime into your CaseViewNet Client software. Any court reporter's software can send realtime to the free CaseViewNet Client using traditional realtime serial cables, splitters and adapters.

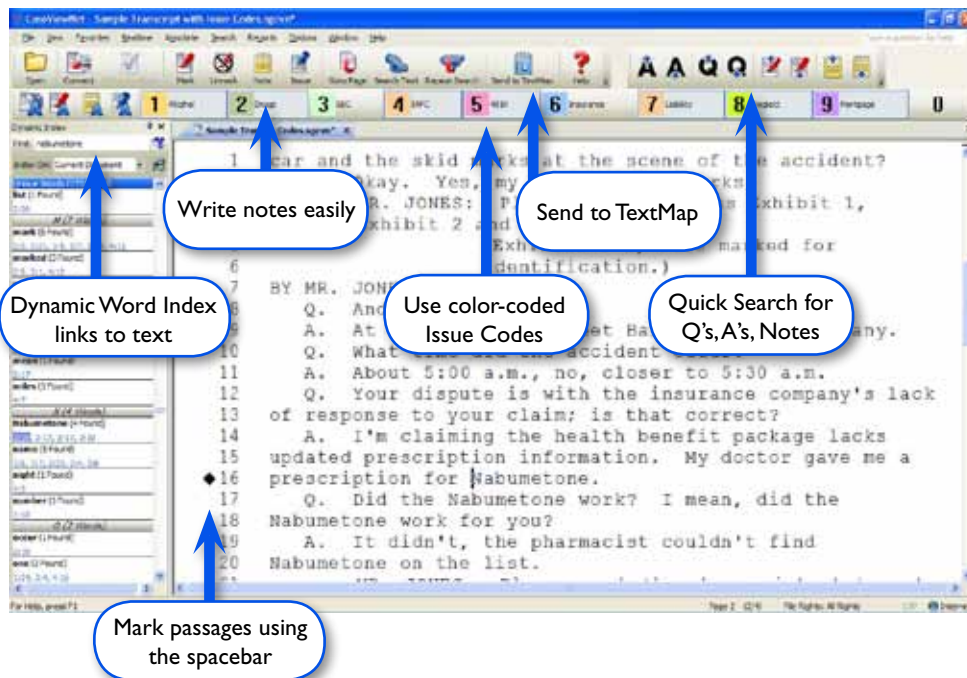

- Free download
- No tokens
- No registration
- No compliance issues
- No compatibility problems

**Get the most out of CaseViewNet:  
Ask for a Case CATalyst / CaseViewNet reporter!**

Instead of wasting time with cables and adapters, use WiFi technology to get on the record right away. Even if you arrive late, you'll receive the entire transcript immediately so you won't miss a thing.

**All the above benefits plus:**

- RapidRefresh™ for cleaner realtime
- Simple WiFi connection
- No cables, adapters, splitters
- NEW! Synchronize with the final transcript

**Features:**

- While you're listening to testimony, stop the realtime text to read more thoroughly and catch up to realtime when you're ready with the touch of a key.
- Mark specific text as it appears by a simple press of the spacebar or when time permits make more extensive annotations including notes and issues to return to while preparing for further examination.
- A Dynamic Word Index shows words in context along with the pages and lines where they appear so you can easily click and go to verify testimony.
- Synchronize your marks, notes and issues with the reporter's final transcript.

## The CaseViewNet advantage!

### Realtime

- The testimony is immediately available on your computer screen for reference without asking the court reporter to read it back or to write time-consuming notes during testimony.
- RapidRefresh™ instantly updates your computer throughout the day as the reporter makes changes, such as adding proper names or special vocabulary, giving you the cleanest rough-draft transcript possible. Again, only available when you ask for a Case CATalyst®/CaseViewNet provider.
- You walk away from the proceeding with the best possible draft of the transcript.
- Testimony can be issue-coded or categorized as it is occurring.

### Compatibility

There's no reason to duplicate work already done during live testimony; simply save the transcript including your annotations to LexisNexis® TextMap®.

	Any court reporter	Case CATalyst / CaseViewNet provider
Cabled serial realtime to CaseViewNet client	■	■
Save transcript and annotations to LexisNexis TextMap	■	■
