

FOR STUDENTS

*Watch your accuracy soar with the Wave™ writer by Stenograph.*

- Large color display of your steno outlines
- Read back directly from the screen without a computer
- Realtime ready when you are
- TrueStroke - automatic touch
- Keyboard tension and depth adjustment wheels right at your fingertips

*A finely-tuned instrument will maximize the effectiveness of your practice and minimize the time needed to increase your speed and accuracy. Unlike all other student writers, the Wave requires no adjustment due to its patent-pending TrueStroke™ technology – the very same technology that's built into Stenograph's professional model, the Diamante.*

#### CLEARLY IN VIEW

The vibrant flat-panel screen clearly displays steno outlines as you write them, giving you the best kind of feedback – immediate feedback– to enable you to practice proper technique, the most expeditious way to advance your consistency and speed.

Stop writing to read back fluently while scrolling notes up or down. With plenty of context to help you interpret what you've written, you'll confidently recite the spoken word. Start writing and you're instantly back "on the record."

#### Display & Navigation Functions

- Scroll Up/Down to find point of readback
- Select font size to one of five

choices for larger text or more context.

- Search for Last Mark to verify or read something you marked earlier.
- Search for a steno outline to find a point of readback.
- Change backlight setting for varying lighting conditions.
- Slant the display panel up to 65°
- Personalize the Splash Screen with .jpg files of your own pictures.

#### REALTIME READY

Included with the Wave is a standard, plug-and-play USB cable that makes connecting to realtime a breeze. And, your teachers will love it as transferring test notes for evaluation is a snap!

#### ON-BOARD MEMORY

A fifty-page memory provides storage of practice materials to be transcribed later. Select all or specific practice sessions when you have access to a CAT computer to transcribe homework or practice. Clear memory and start fresh with new dictation when memory indicates that it is full.

#### GRAB AND GO

Just grab your writer and go – to another class or down the hall – utilizing built-in hand-grips. It's only 4.5 pounds.

Included is a wheeled backpack to hold the writer, tripod, and a special Jet Bag that protects the writer inside the backpack. The Jet Bag functions as a compact shoulder bag for carrying the writer separately from the wheeled backpack when you don't need all your accessories.
