# Case CATalyst®

## New in Version 19

**Make expediting your rough drafts easier**
The Hotspots feature is already a great timesaving tool for transcript editing, but now you can have items you want to check in the transcript categorized by name and color inside of the Hotspots window. Whether it's to check the spelling of a name, a reminder to listen to the audio, or a mark for a scopist, you'll be able to quickly find those items in the transcript.

**See Brief It suggestions phonetically**
You may find it more natural to think about steno phonetically. In Version 19, Brief It gives you the option to see brief suggestions phonetically.

**Build your dictionaries faster**
Hear the words and phrases and then write them phonetically when creating dictionary entries! Dictionary Builder can now speak the words from Case Prep Dictionary Builder lists or any ASCII list.

**Don't just guess about the Cloud Backup status of your files**
It's now easier to know when Cloud Backup has safely stored your files to the cloud. A green dot will appear in Manage Jobs to show when a file is backed up. If the file has changed and is waiting to be backed up, a yellow dot will appear.

**Get help with your Characters Per Line margin setting**
The Characters Per Line Assistant will help you with one of the most frustrating aspects of Page Layout creation. If you know what your left margin should be, CATalyst will automatically figure out your right margin to achieve your desired characters per line for each paragraph style!

Stenograph®

**On an older version of CATalyst and want to upgrade?**
Get your Edge back! Edge for CATalyst is an annual plan that gives you access to CATalyst updates, Cloud Backup, and Technical Support.

**The Edge Plan:**
- Available in low monthly payments
- Includes 100 GB of free Cloud Backup storage to protect your CATalyst files
- Gives you access to our highly trained, U.S.-based support staff

If you already have an Edge for CATalyst plan, you're eligible to receive CATalyst Version 19. There's nothing you need to do other than check for updates in CATalyst.
