# CATalyst® | Version 22

The CATalyst Difference

Throughout its 25-year history, CATalyst has been at the forefront of leveraging advanced tools Stenograph has been perfecting for decades in CAT software that makes work faster, easier, and more efficient. CATalyst Version 22 is all about audio and ease of use, giving you tools to help produce more accurate transcripts.

Direct Audio™

Record and playback multi-channel audio directly within CATalyst, providing increased speaker clarity during editing. Plus Direct Audio allows you to work from anywhere with a simplified setup for remote jobs.

Enhanced Associate Audio

Easily associate common court audio files without using another software application to convert file formats.

Improved Break File

Now, when you use Break File, the SGMCA audio file will also break with each section where the transcript breaks.

Quick Links to Training

Access Ascend Training, CATalyst Academy, and our list of Stenograph Certified Training Agents directly from CATalyst.
