

The Complete Remote Legal Proceeding Solution

CaseTestify is the complete remote legal proceeding solution designed specifically for the legal industry, providing users with a simplified way of taking online proceedings. This innovative and intuitive platform combines secure video conferencing, interactive exhibit management, cloud storage of deposition assets, and ViewScript powered by Phoenix, a realtime in-testimony review tool.

Exhibit Management

Integrated tools make it simple for participants to upload, stamp, and share exhibits. Attendees easily and instantly receive access to all deliverables.

Video Conferencing

High-definition video capture records directly to the cloud with flexible recording modes, enabling an integrated timestamp, allowing agencies to immediately deliver a legal-ready video to their clients.

Built-In Integrations

MAXScribe integration makes it simple to capture single- or multi-channel audio, removing the need for third-party audio capture software. CaseViewNet integration lets users present, view, and search the realtime transcript.

ViewScript

Powered by Phoenix, a custom-built ASR engine for the legal industry, ViewScript provides attorneys with audio and text in-testimony review and instant post-deposition review.

CaseTestify® vs. Other Platforms
