

# End-to-End Integrated Workflow Solutions

Stenograph empowers court reporting agencies and firms to expand their service offerings, enhance their clients' experience, and increase financial performance.

As the leading supplier of productivity tools to the court reporting profession, we maintain a culture of innovation centered on creating new products, solutions, and approaches to address the changing business dynamics throughout the court reporting industry.

The integration of Stenograph's CaseTestify, MAXScribe, and YesLaw, give you the court reporting industry's only platform for recording and annotation, remote proceeding capture, live text streaming, realtime Automatic Speech Recognition (ASR) translation, transcript editing, and transcript production.

Suite of products that are designed to work together to give you and your team a highly efficient workflow providing **operational excellence**.

Integration with **CaseViewNet** allows you to offer and securely transmit realtime text to clients, attorneys, and judges in the same room or remote.

Realtime reporting and editing collaboration helps turn around transcripts faster than before, allowing you to offer **same-day services**.

Included access to **Stenograph's Digital Reporting Academy** provides you with all the tools you need to master the basics of the software.

Dedicated and knowledgeable **Technical Support** team available to answer any questions and resolve any issues.

The CaseTestify logo is displayed within a white circle. The word "CaseTestify" is in a green sans-serif font, with a registered trademark symbol (®) to the upper right.

**CaseTestify** is an all-in-one purpose-built legal platform that provides users a simplified way of taking remote legal proceedings.

- Secure video conferencing platform
- Integrated exhibit management
- Cloud storage of deposition files, including video, exhibits, and the transcript
- Audio and text in-testimony review for attorneys with ViewScript, powered by Phoenix
- CaseViewNet integration provides a realtime transcript from the court reporter

The MAXScribe logo is displayed within a white circle. "MAXScribe" is in a large green sans-serif font with a trademark symbol (™). Below it, "powered by Phoenix" is written in a smaller green font, with a small green Phoenix logo icon to the right.

**MAXScribe** is designed for the digital court reporting and legal transcription industry, incorporating recording and annotation, live text streaming, live text editing, ASR translation, and transcript editing within a seamless process.

- Multi-channel audio recording physical and virtual channels
- Powered by Phoenix, Stenograph's custom-built speech recognition technology for the legal industry
- Deliver same-day transcripts using RealTeam's collaborative editing tools
- Stream the transcript in realtime with CaseViewNet
- CaseTestify integration provides the direct capture of virtual audio channels during remote depositions for a more accurate speaker diarization

The YESLaw logo is displayed within a white circle. The word "YESLaw" is in a green sans-serif font, with a registered trademark symbol (®) to the upper right.

**YESLaw** is the complete and convenient solution for transcript production including web delivery, full featured PDF transcripts, and synchronized video.

- Online transcript repository to store, share, view, edit, and search synchronized transcripts and videos
- Produce PDF formatted transcripts in full and condensed versions
- Hyperlink to both exhibits and the keyword index
- Synchronized video available for delivery online or DVD
