MAXScribe™ Training

Whether you are new to MAXScribe or looking for ways to become more efficient and learn new skills, Stenograph has the training to make you more successful. We offer training options for reporters, transcribers, and even agencies looking for a customizable solution.

Stenograph Digital Reporting Academy

The Stenograph Digital Reporting Academy provides MAXScribe users with all the tools they need to master the basics of the software. Role-specific learning paths and self-paced lessons allow you to learn at your convenience through training videos, handouts, and interactive exercises.

Discover courses that will help you understand how to effectively capture the job using MAXScribe, how to use the Phoenix ASR engine to translate audio, and how to use MAXScribe's tools to edit faster than you ever have before. Plus, we have additional courses available to train you beyond the basics- like how to collaboratively edit using RealTeam® and how to produce a final transcript for YesLaw®.

The Stenograph Digital Reporting Academy was designed for individual users of MAXScribe, as well as agencies looking for a customizable training platform. Access to the Stenograph Digital Reporting Academy is included with MAXScribe. For more information on how to access and start your training, contact your Customer Success Manager.

Integrated Training Videos

Included right within MAXScribe, integrated training videos are tutorials designed to give users easy access to information about how to use the software. You can access these from the Help menu within MAXScribe under Integrated Video Training. Then select the topic you are interested in from the list.

Certified Training Agents

Looking for more in-depth training to help perfect your transcript editing and master everything you learned in the Digital Reporting Academy? Stenograph has Certified Independent Training Agents trained on MAXScribe and available for personalized one-on-one sessions for an additional fee. This is the perfect option for someone looking for individual help and guidance on layouts, formatting, or furthering their knowledge of advanced editing tools.
