

Simultaneous Editing with RealTeam™

RealTeam gives you the ability to have multiple people simultaneously editing a file during realtime proceedings and after! All edits are shared among the team and immediately sent to any client connected through CaseViewNet for Windows, iCVNet, or CaseViewNet Browser Edition. It's like having reporters, scopists, and proofreaders sitting right next to each other no matter their physical location. Edge for CATalyst contract required.

SECURE

EASY TO USE

It's like writing realtime with a **SAFETY NET**

TAKES THE STRESS OUT of daily copy

Reporters can choose to have the scopist's defines go **DIRECTLY TO THEIR DICTIONARIES**

Files are stored in the **PROPER LOCATIONS** for each participant

Produce transcripts **FASTER** than ever before
