# RealTeam™ for MAXScribe™

RealTeam for MAXScribe gives you the ability to have multiple people simultaneously editing a transcript! During the proceeding, or when the job is done, simply share the ASR generated transcript, multi-channel audio, and annotations with transcribers and editors who can review and edit. Changes made to the transcript will be seen in real time by all other RealTeam participants and immediately sent to any client connected through CVN. It's like having everyone sitting right next to each other regardless of their physical location!

SECURE

EASY TO USE

Produce transcripts **FASTER** than ever before

Integration with CaseViewNet for a **REALTIME** experience

MULTI-CHANNEL AUDIO is available to all participants

EDITORS HAVE ACCESS to annotations captured during the job
