Sending to CaseViewNet Cloud Gateway with ANY CAT Software

1. Double click the **CaseViewNet Cloud Gateway icon**. Note the serial port assignment.
2. In your CAT software, select the appropriate options to output to CaseView and select the COM port designated in the CaseViewNet Cloud Gateway.
3. In the CaseViewNet Cloud Gateway, click Connect. Type your Session Code and create a password and click OK. Each of the participants will need to know your Session Code and password.
4. When the realtime session is complete, be sure to end the CaseViewNet Cloud Gateway session by clicking the Disconnect button.

Connecting to Cloud in CaseViewNet Version 3.00

1. In CaseViewNet, click the **Connect** icon to display the Connection Wizard.
2. Click Next, select **By Session Code**, and then type your Session Code.
3. Click Next twice, and then type your **Password**.
4. Click Next, and then Finish. It is that easy to use Cloud in CaseViewNet!

Connecting to Cloud in iCVNet Version 1.3

1. In iCVNet, tap the **Connect** button to display the Connection Screen.
2. Tap **Internet Connection**, and then input your Session Code and Password.
3. Tap OK. It is that easy to use Cloud in iCVNet!
